# Introduction

The "Evaluation of Academic Performance" project aims to develop an online programme or website that will provide faculty with access to a platform where they can easily keep track of the grades that students receive on internal exams, assignments submitted by the students, and their attendance, in order to evaluate students' performance without the hassle of creating time-consuming spreadsheets. It makes life easier for the staff by consolidating all student data onto a single platform. This website will be useful for the students as well because they can monitor their activities.

## PROJECT OBJECTIVE

Providing the online interface for students, faculties. Increasing the efficiency of school record management. Decrease time required to access and deliver student records. To make the system more secure. Decrease time spent on non-value-added tasks. Providing the online interface for students, faculties. Increasing the efficiency of school record management. Providing the online interface for students, faculties. Increasing the efficiency of school record management. Decrease time required to access and deliver student records. To make the system more secure. Decrease time spent on non-value-added tasks.

## Conclusion

When there are a variety of factors used in the evaluation, qualitative evaluation involving assessment is typically subjective, which can cause issues with opinion and make it difficult to determine which pupils do better. Also, compared to the current existing traditional method practices, it simplified the work of the assessors because they were not required to do the difficult and time-consuming operation.
